

CLAIMS

1 1. Partition of glass consisting of at least two frameless side parts (2, 3), which
2 are attached to the floor (8) and to a ceiling construction (7), and of at least one frameless glass
3 element (4), which is attached to the two side parts (2, 3) and to the ceiling construction (7),
4 characterized in that the glass element (4) is attached nonpositively to the side parts (2, 3) and
5 to the ceiling construction (7) exclusively by the use of a permanently elastic compound (9).

1 2. Partition according to Claim 1, characterized in that the permanently elastic
2 compound (9) consists of silicone and/or acrylic.

1 3. Partition according to one of the preceding claims, characterized in that the
2 side parts (2, 3) and the glass element (4) are connected to each other along their longitudinal
3 edges.

1 4. Partition according to one of the preceding claims, characterized in that a
2 profile (5), into which the glass element (4) and the side parts (2, 3) fit, is installed on the
3 ceiling construction (7).

1 5. Partition according to one of the preceding claims, characterized in that
2 bottom and/or ceiling profiles (5, 6) are provided, in which each of the side parts (2, 3) are
3 held by means of the permanently elastic compound (9).

1 6. Partition according to one of the preceding claims, characterized in that
2 vertically oriented stiffening elements (11), which project perpendicularly, i.e., at a 90° angle,
3 are attached to the side parts (2, 3).

1 7. Partition according to one of the preceding claims, characterized in that the
2 stiffening elements (11) are attached by means of a permanently elastic compound (9).

1 8. Partition according to one of the preceding claims, characterized in that a
2 leaf (10) is provided in a doorway (15) underneath the glass element (4) and between the side
3 parts (2, 3).

1 9. Partition according to one of the preceding claims, characterized in that the
2 side parts (2, 3) and the glass element (4) of the partition (1) are configured to form a straight
3 line.

1 10. Partition according to one of the preceding claims, characterized in that the
2 side parts (2, 3) and the glass element (4) of the partition (1) are arranged at angles to each other.
